

## We're the category leader for 3 simple reasons

### *purity*

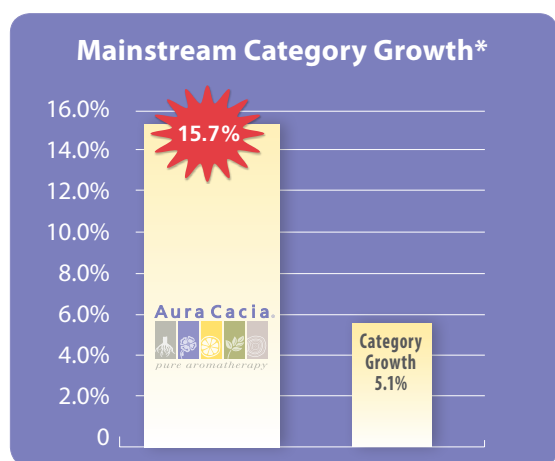

Every batch of essential oils are GC/MS tested to guarantee 100% purity. For aromatherapy, purity equals effectiveness, and we provide nothing less.

### *integrity*

You can be sure that what's on the label is really what's in the bottle. Giving customers what they expect and pay for is the only way we do business.

### *sustainability*

We source our essential oils from farmers committed to sustainable practices—social, economic and environmental. We impose the same high standards on our own facilities where our essential oils are bottled and our aromatherapy products are made—right here in the USA.
