

notes from the field

Location: *South Central Chile*  
Product Sourced: *Organic Red Clover Blossoms*

The Story: *The rich volcanic soil and deep, glacier fed wells around Mount Villarrica has produced incredibly fertile farmland. In this area, where organic farming is the norm, we found an 800 hectare, 100% organic farm to source our red clover. These delicate blossoms are hand-harvested by approximately 100 indigenous farmers, whose labor is rewarded with a good living wage and excellent education for themselves and their families.*
