

notes from the field

Location: *Czech Republic*

Product Sourced: *Organic Parsley*

The Story: *The source of our organic parsley is a farm that utilizes modern, high tech methods to ensure quality and sustainability. At harvest, the crop is transported from field to dryer in 30 minutes, preserving optimum flavor, color and freshness. Waste is reused to create biogas which powers the processing. And its by-product is then used as fertilizer. Housing is provided for seasonal workers who are paid above average wages.*
