

notes from the field

Location: *Denizli, Turkey*

Product Sourced: *Organic Cumin*

The Story: *On our last annual visit to Turkey, we witnessed the effects of drought, which has caused a 70% loss of all crops in the country. This has made life hard for our suppliers—small farmers working only between 2-10 hectares. To help them weather the drought, we made a long term commitment to purchase their crops. We also help support a local organic agricultural engineer who visits 7-8 times a year to perform quality control and assist with maximizing high quality yields.*
