

notes from the field

Location: *Tefenni, Turkey*

Product Sourced: *Organic Fennel*

The Story: *The sweet fennel fields are in full bloom in July. Here the organic farmers are supported by an agricultural engineer—specifically dedicated to organic methods—advising them on ways to improve quality, increase yields and maintain the health of the soil. This coupled with access to a spring fed irrigation system, secures a consistent supply of the highest quality sweet fennel, year after year.*

Part of our Well Earth sourcing program.
